The purpose of this special issue of our conference is to contribute latest research advances in natural sciences and technology by the scientific and research communities. We have selected some papers submitted to the 6th International Conference on Natural Science and Technology (ICNST'19) through our peer review process. Science and Math Program of Asian University for Women (AUW) organizes ICNST each year since 2014. We have International Advisory and Review Boards to facilitate the researchers with best papers to publish in scientific journals. It is a multi-disciplinary conference covering the fields of Biosciences and Bioinformatics, Environmental Sciences, Information and communication technologies, Public Health and Interdisciplinary Science. This conference also includes "Women in Science session" which has been a vital part of this event since 2014 in order to generate a platform for women researchers and scientists from STEM to share their story in research and innovation.

We would like to acknowledge the remarkable effort shown by the Organizing Committee as well as all the students who are key role players and leaders for this conference. Our special thanks to all of our sponsors and media partners. We also would like to thank to our Keynote Speakers who have kindly accepted our invitations to present their valuable knowledge with us. Congratulations and thanks to all the participants who showed patience, followed our guidelines and joined us for the success of ICNST'19. We hope that the achievements of ICNST'19 will play a small but significant role to take our scientific journey forward.
